Guru Alliance and OurTech Solutions Announce Alliance

Partnership offers enterprise network support and intelligent document management services

Omaha, NE – June 21, 2010 – Guru Alliance, a woman-owned minority certified software development and outsource solutions provider, and OurTech Solutions, an award-winning provider of network monitoring, maintenance and management solutions, are pleased to announce a strategic alliance for offering a turn-key solution for enterprise network support and document management.

The partnership will offer OurTech Solutions existing and new clients with an intelligent document management solution – idocSOURCESM. idocSOURCE is an enterprise-class, web-based document management platform that enables organizations to ingest, index, compress, encrypt, and archive enterprise-scale amounts of information, and access and retrieve specified information instantaneously anywhere, anytime via the Internet. Guru Alliance will offer clients OurTech Solutions proven support services for monitoring and managing their network and computing environment.

“We are excited about our partnership with Guru Alliance and ability to offer idocSOURCE to our clients,” said Robert Troyer, CEO, OurTech Solutions. “Guru Alliance is a proven software development company, that provides innovative solutions that solve common business issues, enabling companies to improve business processes, reduce operational costs and produce positive results to the bottom line.”

“OurTech Solutions is the type of alliance we look for and value greatly,” said James Hoshor, Vice President, Guru Alliance. “With a proven and successful track record in providing enterprise network monitoring, maintenance and management services, OurTech Solutions services and expertise complement our services and solutions 100% enabling us to provide a full-service approach to our clients IT and business needs.”
